

FACE SHIELD WITH HARNESS

K335.0101

Description

Face shield protecting against liquid splashes, used to control infected people. A complete set with easily adjustable head circumference in the range of 52-62 cm. Equipped with replaceable sweaters. Opening/closing of the face shield. The deep positioning on the head prevents accidental falling. Complies with the requirements of EN 166 standard. Provides protection in the field of face shield against liquid splashes and medium energy impacts. It has an internal coating to prevent fogging. CE marking.
